1 Introduction

Darkspear is an application that is designed to help gamers find other people to play their favorite games with.

2 Installation Guide

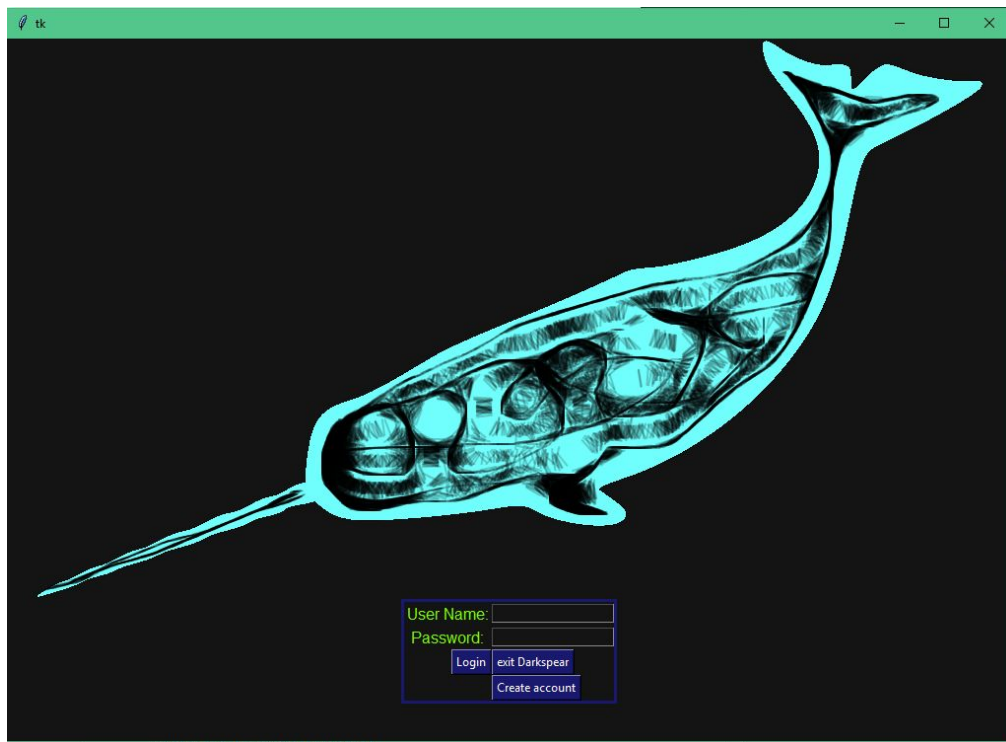

Extract Darkspear.zip into desired location. See Readme if more setup is required.

3 System Requirements

Darkspear requires Python version 3.7.1 64-bit version to run. For the developers version a mysql server and workbench download is required as well.

4 Quick Start Guide

1. Navigate to where you installed the application and double click main.py. This will bring up the login screen.

2. Creating an account.
 1. Enter the desired Username and Password in the fields
 2. Click the Create account button
 3. Your account should now be in the database.

3. Logging in.
 1. Enter your username and password. (in the current version the only login info working is the username Zuroke, and the password poophead)
 2. Click the login button.
 3. Your home page will then be displayed.

5 Main Scenarios of Use

5.1 Add a game to your played game list

1. Click on the Add Game button on the home page near the bottom left of the screen, this will bring up a list of games not on your played game list.
2. Click on a button to add that game to your list of played games.

5.2 Joining a clan

1. Method 1

1. On the home page enter the name of a game in the field next to the Find Clan button on the home page.
2. On the home page, click on the Find Clan button.
3. This will bring up a list of clans that play the game you typed in.
4. Click on one of the buttons with a clan name and you will join that Clan.

2. Method 2

1. On the home page click on the List Games button on your home page.
2. A list of games you play will be displayed.
3. click on one of the game buttons to display a list of clans that play that game.
4. click on one of the buttons and you will join that clan.

5.3 Edit Bio

1. on the home page enter what you want your bio to say in the entry field next to the Edit Bio button.
2. Click the Edit Bio Button.

5.4 Send a message to a friend

1. From the home or clan page click the friends button on the left side of the application.
2. Once in the friends menu click on the button with the name of a friend on the left side of the chat box.
3. Then enter the message you want to send in the entry box inside the pink rectangle.
4. Next click the submit button in the bottom right of the screen.

5.5 View your clans

1. From the home or friends page click on the clan button on the left side of the screen.
2. From here you can click on a clan name button you wish to view under the exit Darkspear on the left side of the screen.

5.6 Send a message to your clan

1. From the clan page click on the clan button you want to send a message to.
2. Type your message into the chat box at the bottom of the screen, then click submit to send your message.

5.7 Change clan announcement

1. From the clan page enter the announcement you want to display for the clan to the right of the edit announcements button.
2. Click on the edit announcement to submit the announcement.
3. (To be implemented) Only clan leader should be able to edit the clan announcement.

5.8 Add an event to your clan

1. From the clan page enter the event you want to display for the clan to the right of the edit announcements button.
2. Click on the edit event to submit the event.
3. (To be implemented) Only clan leader, or officer should be able to edit the clan events.

5.9 Zombie Game

1. From the home page, click the Zombie button on the left side of the screen
2. From here type first into the bar at the bottom and then click submit.
3. after this you make choices by clicking the buttons on the bottom of the message box.

6 Troubleshooting

6.1 Missing or Incorrect Password or Username

A message will be displayed in the event incorrect login information is entered. Try again with proper credentials to access the application. If trouble is encountered, retrieve proper login information directly from the server administrator.

6.2 Game not showing up when trying to add a new game to your list

If when you are trying to add a game to the list of games you are playing and the game you are looking for is not appearing, contact your server administrator and they will add the game to the database. (we are also working on a way to add games inside the application but that will be implemented in a future version.)

6.3 Program won't start

If when you double click main.py to start the application and the only thing that happens is a command window opens briefly and then closes. This means that the server you are trying to connect to is not active or you are unable to connect to the server for other reasons. For this issue you will need to contact the server administrator to fully diagnose and fix the issue. If the program still wont work be sure that you have the right version of python installed on you computer and that python.exe is in your machines file path.
